Environment Setup & Version Control

Objectives

- 1. Set-up CSEE Gitlab Account
- 2. Create your Personal Access Token on Gitlab (your secrets)
- 3. Save your secrets to Google Colab
- 4. Plan work scope, activities, outputs & create Gitlab branch
- 5. Run code to clone the specific branch from Gitlab repo -
- 6. Locate your branch files in google drive
- 7. Fun time? write your own codes
- 8. Run "3. Finish and Save back to Gitlab" section
- 9. Create merge request on Gitlab

https://colab.research.google.com/drive/ e/1_UYmlXTkxNQ2PFi7zt3EqOVh5B Vz48Lv?usp=sharing

1 - Set-up Gitlab & Personal Access Token (PAT)

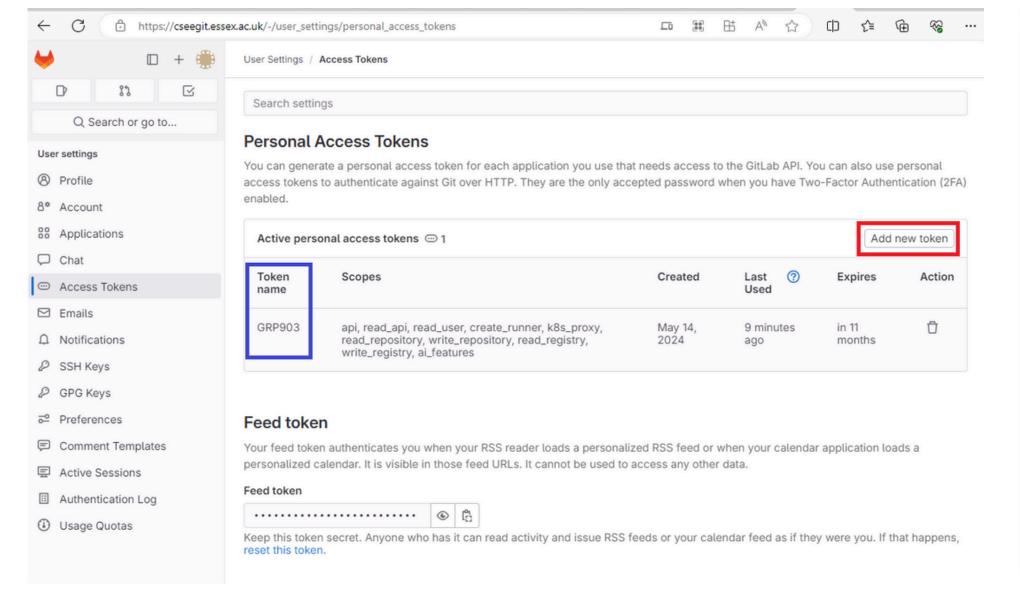

Access GITLAB Account

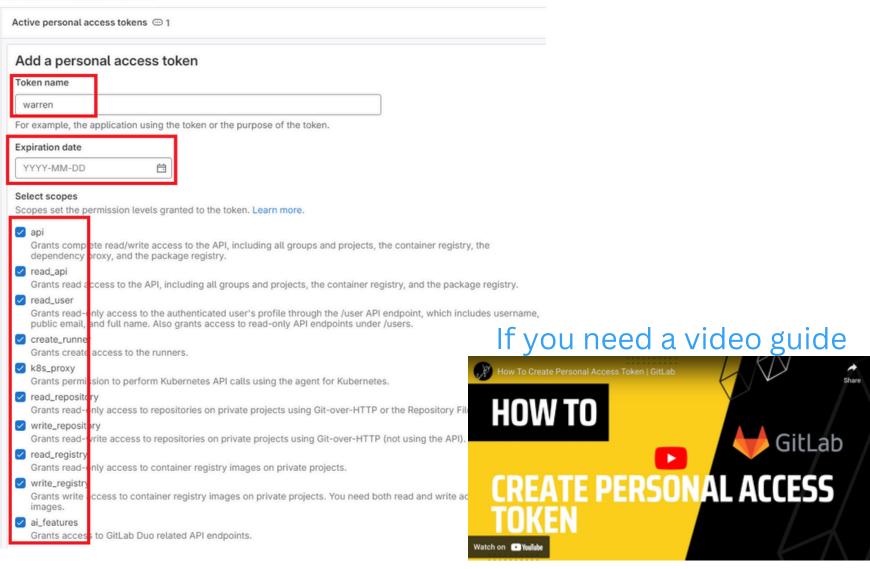

https://moodle.essex.ac.uk/course/view.php?id=16545§ion=18

Once logged in use this link to Set-up PAT

https://cseegit.essex.ac.uk/-/user_settings/personal_access_tokens

Personal Access Tokens

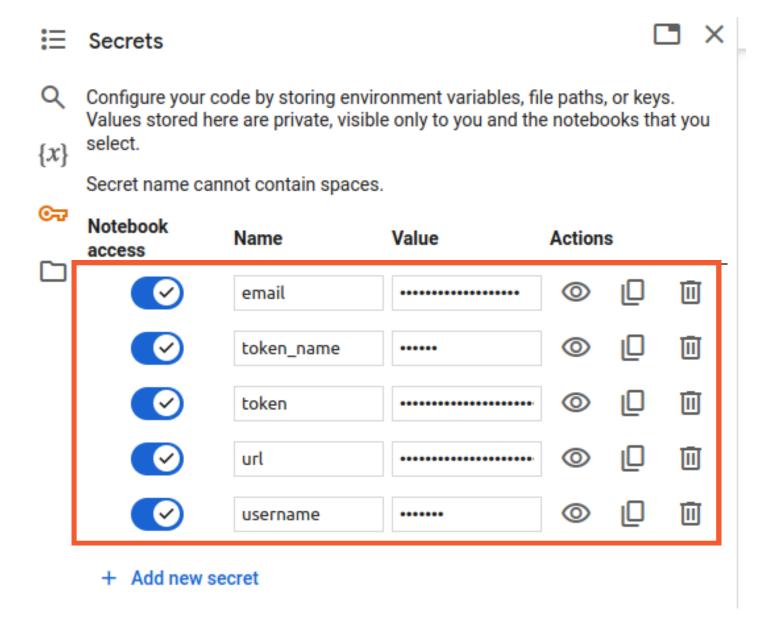

2 - Save secrets to Google Colab

How to Setup Secrets

https://www.youtube.com/watch?v=LPa51KxqUAw

Add the following secrets shown below

3 - Define Work Plan, Login to GITLAB and Create Branch

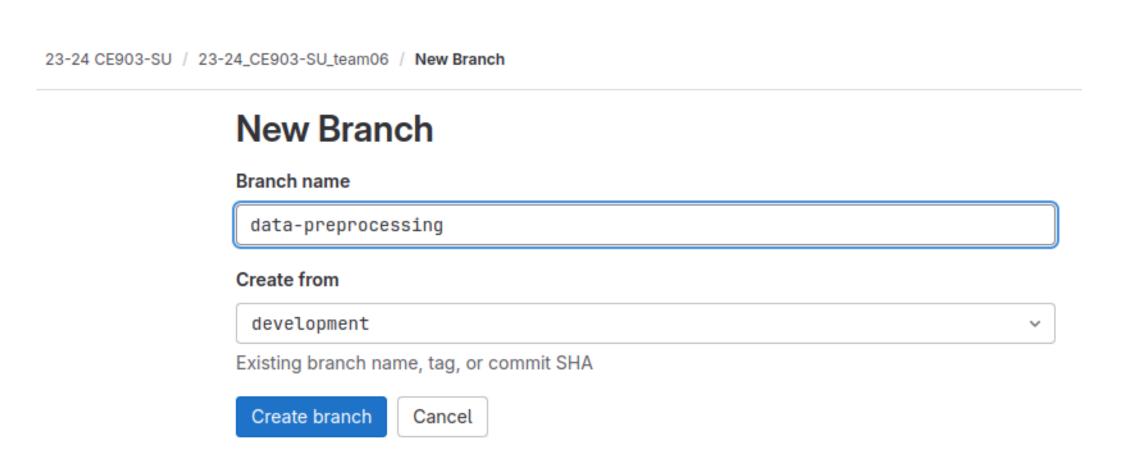

SCOPE: data-preprocessing

Actions

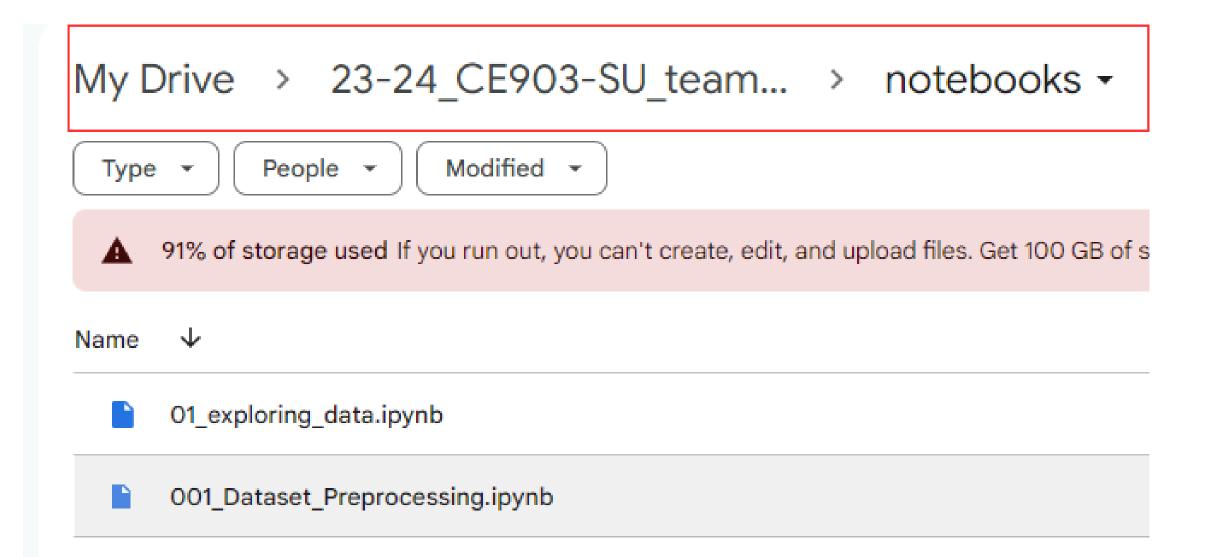

- Read audio files
- Trim silence
- Create overlapping frames from each file
- Generate labels for the frames

Expected Output

 CSV file containing frame, sampling rate, label

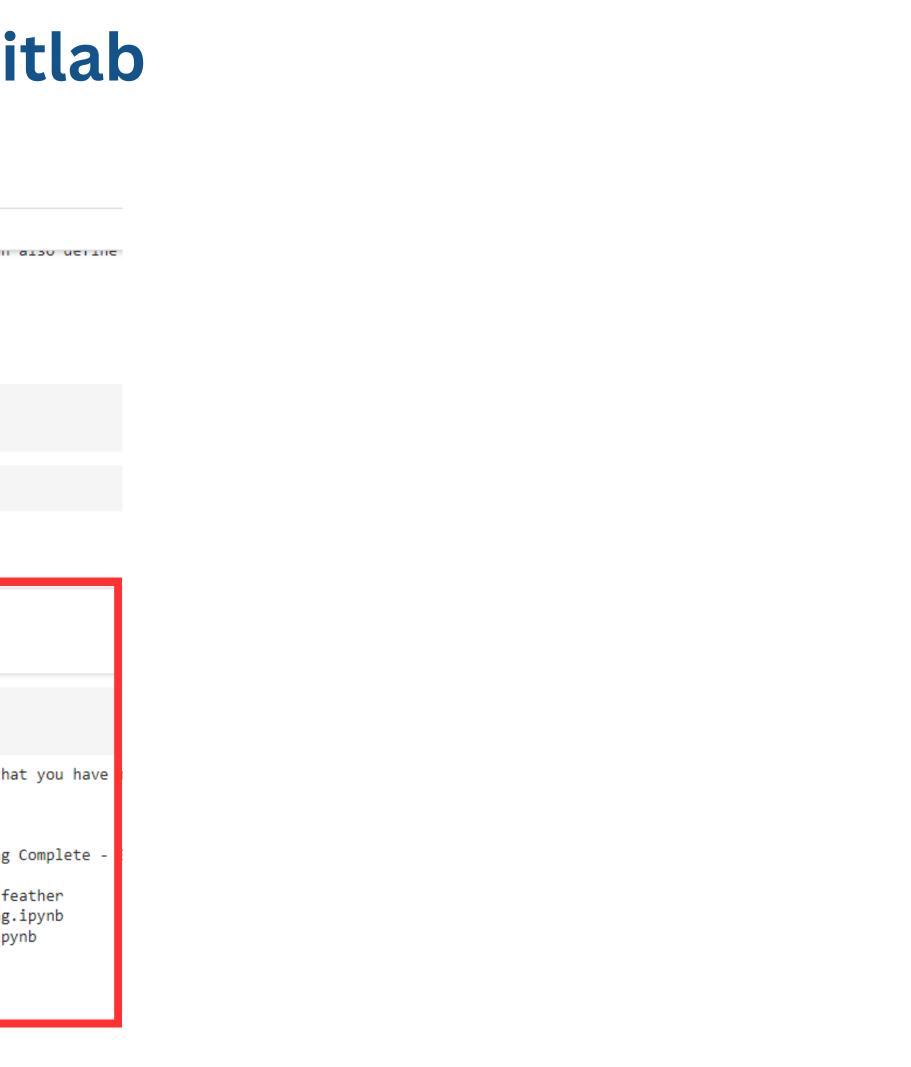

4 - Locate your branch files in google drive

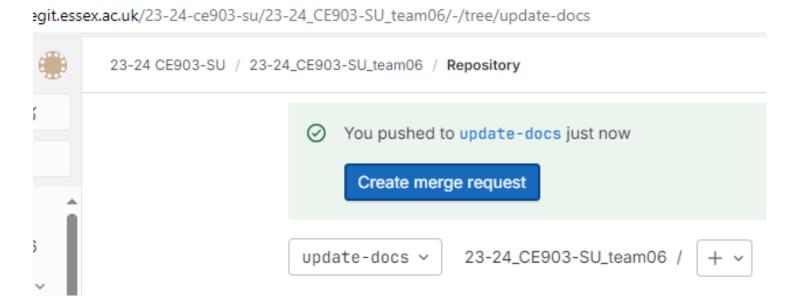

4 - Save your work back to Gitlab

5 - Create merge request on Gitlab

New merge request
